NATIONAL C&R CENTRE TO HOST PPCT CLOSE QUARTER COUNTERMEASURES COURSE

MLA is delighted to announce their next PPCT course to be held in Close Quarter Countermeasures in conjunction with the Home Office C&R National Centre, Lindholme near Doncaster.

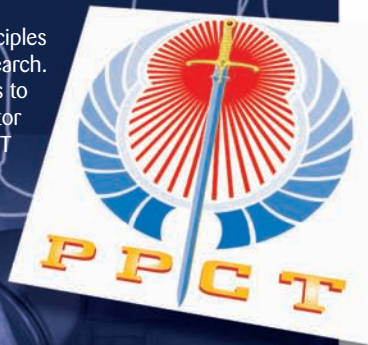

The course, which will take place from Monday, October 30 to Friday, November 3, prepares operators to use a simple and systematic CQC system designed for apprehending subjects during dynamic entries, hostage rescue or to control a surrendering subject.

Topics covered in the course include non-lethal force control for tactical entries; door extraction and disarming techniques; co-ordinated edged/blunt weapon control and the psychology of combat performance.

The course is backed up by the PPCT principles of extensive tactical, legal and medical research. It will last five days and will enable students to gain the qualification of PPCT CQC instructor which is valid for three years. Two top PPCT trainers will be coming from America to teach the course.

It is open to all full-time force and established instructors. No previous experience of PPCT is required.

For any more information please do not hesitate to contact us on (01759) 318557 or come and see us at ACPO on stand 13/14.

COME AND MEET BIG BLUE!

A BRAND new training dummy is available from MLA. Big Blue weighs 70lbs, has a steel internal frame and is filled with foam. This gives it a firmness allowing it to support itself when doing throws and takedowns. However it is still flexible enough for ground fighting. The dummy can be used for self-defence and baton training and for handcuffing and ground control techniques. It's wrists are downsized for handcuffing techniques. Big blue can be hung for striking techniques and there are straps both front and back to help hold and manoeuvre the dummy. Come and see him on stand 13/14 at ACPO.

STOP VEHICLES IN THEIR TRACKS WITH MLA'S LATEST PRODUCT

**EXTREMELY SAFE TO USE. GLOVES OR GOGGLES
DO NOT NEED TO BE WORN.**

PEOPLE who refuse to stop their vehicles for police can now be tackled safely with a safe tyre deflation device now being offered by MLA. Stop Stick is engineered to deflate tyres without blowout. Hollow Teflon coated quills act as valves releasing air at a safe, controlled rate. No debris is left on the road and it can be both quickly deployed and then removed from the road.

Already being used by hundreds of UK police officers Stop Stick:

- Deflates tyres on cars, buses and lorries
- Multi-directional spikes ensure correct deployment (any side can be facing down)
- Simple design is not dependent on complicated technology such as wires and remote controls.
 - Deployment sleeve, with 80ft cord, allows the deploying officer to stand a safe distance from the road
 - Works on a variety of terrain
 - Lightweight construction (just over 1lb) makes deployment and retrieval virtually effortless

Stop Stick is just one of several tyre deflation devices being offered by MLA. We offer a range of other products to suit a vast range of operational requirements. These include the Piranha; designed for officers on covert observations when they do not want a vehicle to drive off. This four inch device is placed in front of one of the tyres and if the car drives off they will have a flat in about four seconds.

Other products include the Terminator for use at check points and the Barracuda which is very similar.

For more information please contact MLA on (01759) 318557 or come and see us at stand 13/14

CARL ZIESS BINOCULARS FOR LAW ENFORCEMENT

As a professional, your life, and the lives of others, can depend on your optics.

ZEISS has a long tradition of providing the absolute best optics, with exceptional brightness, low-light capability, and superior resolution of fine details at great distances.

For more information come and see us on stand 13/14 or call (01759) 318557.
