Dear Ian

V3/R VISOR FOR USE WITH A GUARDIAN MK3 HELMET

After review of your submitted modified visor for use with a respirator (as shown on the attached document) I accept the modification to the visor for use with respirators. This does not imply that the helmet and visor are suitable for CBRN use as the Public Order Helmet Standard (PSDB21/04) does not test respirator compatibility to this level.

Please ensure that the documentation supplied with these visors specifies that this is a visor for specialist use and not general public order duties and as such does not offer the same protection as that offered by a standard public order visor that has passed compliance testing to PSDB21/04.

In addition, please also ensure that the appropriate labelling as specified in the standard is attached to the visor.

Yours sincerely

Chris Malbon
Project Manager
